

# Community service & leadership

Service on ERC/GACR panels (leaders of panels), editorial boards

Organized international events and workshops (Statistics of Machine Learning series)

Awards and frequent invited talks + top venues (WFA, EFA, SoFiE)

EUR 2M EXPRO grant + many others

Most cited research papers in Financial Econometrics

Successful PhD students

# Strengths & where we aim higher

(+) We are small department focused on fundamental research with impact

(+) Clear shift towards quality

(-) Main portion of the funding is from short-term research projects = large fluctuation of part time researchers

(-) problematic long-term strategic planning in terms of stable positions

(+) Strong recognition and service

Future: more interdisciplinary links, expand capacity, knowledge transfer
